WORK EXPERIENCE

Senior Data Scientist

Peloton [↗](#)

10/2023 - Present

New York, USA

- Generated **\$2M in monthly revenue** by implementing a used equipment activation fee, capitalizing on the rising trend of secondhand purchases.
- Drove revenue growth and product upgrades by **leading the launch of a secondhand marketplace**, strategically designed using insights into user behavior and upgrade cycles.
- **Increased trial conversion by 15%** and **reduced music royalty fees by \$200k/month** by analyzing user behavior related to free trial sign-ups.
- **Enhanced C-suite's decision-making** capabilities by developing and deploying a comprehensive dashboard providing daily, actionable insights into critical KPIs using Looker.
- **Improved customer retention** by analyzing post-purchase surveys on user preferences and engagement signals, presenting insights for targeted strategies.
- Determined the optimal pricing structure for shared users, **maximizing revenue** by analyzing user engagement and price elasticity using logistic regression.

Data Scientist

Candid [↗](#)

09/2021 - 02/2023

New York, USA

- Achieved a **5% increase in conversion and revenue** by modeling user profiles using K-Means clustering, directly influencing the GTM strategy.
- Managed transition from DTC to B2B, **speeding Operations velocity by 30%** with factors influencing funnel conversion, and collaborated with Product to evaluate the product launch that drove increased user revenue and improved user experience.
- **Grew revenue by 25%** by forecasting product volume and optimizing Marketing spending utilizing Vector AR models.
- **Contributed to a 15% increase** in first-quarter sales by collaborating with Product to alleviate user pain points through AB testing.
- Enhanced Engineering data model **efficiency by 85% using dbt**, enabling data democratization and insights through Sigma.

Data Scientist

PagerDuty [↗](#)

09/2019 - 12/2019

San Francisco, USA

- Achieved a **40% increase in user acquisition** and a **15% improvement in Sales win rate** by developing a Cox survival analysis model to identify high-propensity accounts.
- **Increased revenue by 7%** by building a predictive regression model to forecast account expansion, directly influencing Sales strategy.
- Enabled Sales & Marketing executives to make informed decisions and achieve quarterly targets by providing accurate forecasts for pipeline coverage using SARIMA.

Data Scientist

CIBC Data Studio [↗](#)

09/2018 - 12/2018

Toronto, Canada

- Enabled better-informed investment decisions for Innovation Banking & Risk teams by achieving a 70% F1-Score in predicting the performance of current and future startups using a Naive Bayes classifier.
- **Reduced losses for Anti-Money Laundering by 20%** by utilizing K-Means clustering to identify and prevent fraudulent transaction behavior.
- **Eliminated product bottlenecks** and **improved user satisfaction** by conducting sentiment analysis using TF-IDF on data processed with GCP.

EDUCATION

BMath; Major in Statistics, Minor in Computer Science

University of Waterloo

2015 - 2020
