WORK EXPERIENCE

AI Engineer

Siro AI

2026 - Present

New York, USA

- Architected an **LLM pipeline** via **LangChain** and **TypeScript** to automate sales-call scoring, developing a dynamic context layer that uses organizational playbooks to ensure high-fidelity evaluations.
- Built a post-scoring citation pipeline that pairs metrics with transcript quotes and timestamp evidence, enabling high conviction coaching conversations.
- Authored semantic schema documentation enabling Claude to query live Postgres databases via **Model Context Protocol (MCP)**, allowing team members to extract data insights through natural language without writing SQL.
- Independently led an end-to-end migration of production analytics to Sigma in four weeks, redesigning executive-facing dashboards around leading indicators and actionable coaching signals for sales leadership.

Senior Data Scientist

Peloton

2023 - 2025

New York, USA

- Generated **\$2M in monthly revenue** by implementing a used equipment activation fee, monetizing on the rising trend of secondhand purchases.
- Drove revenue growth and product upgrades by **leading the launch of a secondhand marketplace**, strategically designed using insights into user behavior and upgrade cycles.
- **Increased trial conversion by 15%** and **reduced music royalty fees by \$200k/month** by analyzing user behavior related to free trial sign-ups.
- **Improved customer retention** by analyzing post-purchase surveys on user preferences and engagement signals, presenting insights for targeted strategies.
- **Partnered with C-suite** to determine the optimal pricing structure for shared users, **maximizing revenue** by analyzing user engagement and price elasticity using logistic regression.

Data Scientist

Candid

2021 - 2023

New York, USA

- Enhanced Engineering data model **efficiency by 85% using dbt**, enabling data democratization and insights through Sigma.
- Achieved a **5% increase in conversion and revenue** by modeling user profiles using K-Means clustering, directly influencing the GTM strategy.
- Managed transition from DTC to B2B, **speeding Operations fulfillment by 30%** with factors influencing funnel conversion, and collaborated with Product to evaluate the product launch that drove increased user revenue and improved user experience.
- **Grew revenue by 25%** by forecasting product volume and optimizing Marketing spending utilizing Vector AR models.
- **Contributed to a 15% increase** in first-quarter sales by collaborating with Product to alleviate user pain points through AB testing.

Data Scientist

PagerDuty • Internship

2019

San Francisco, USA

- Achieved a **40% increase in user acquisition** and a **15% improvement in Sales win rate** by developing a Cox survival analysis model to identify high-propensity accounts.
- **Increased revenue by 7%** by building a predictive regression model to forecast account expansion, directly influencing Sales strategy.
- Enabled Sales & Marketing executives achieve quarterly targets by forecasting pipeline coverage with SARIMA time series models.

EDUCATION

BMath; Major in Statistics, Minor in Computer Science

University of Waterloo

2015 - 2020
